## OUR **FIVE STEP** BUILD PROCESS

### Assess Needs

We work with you to determine your needs and budget, creating an accurate quote.

### Design

We draft a product design, including all equipment, & then select paint colors.

### Build

We meticulously fabricate and pre-fit all equipment, then complete paint and final detailing.

### Test

We thoroughly test all products to ensure proper installation and functionality.

### Delivery

Products are completed & ready for pick-up once final payment is received.

### HISTORY

Founded in 1987, Taylor Pump & Lift Company Inc., is family owned and operated, and built upon years of experience in the oil lubrication equipment industry. Based on this knowledge and experience, our unique line of mobile lube units combines efficiency and ergonomics to get the job done right. We custom fabricate and assemble the best mobile lube trucks, lube skids, lube trailers, and lubrication system installs in the industry.

### WARRANTY

We are not interested in selling you the largest truck possible. Instead, we tailor our lube solutions to match your company's size and budget considerations. We want you to leave with a product that you can afford, contains everything you need, and exceeds your expectations in every way. To ensure that is the case, we guarantee the lube-dispensing parts on all lube truck bodies and lube skids manufactured at our facility with a 5-year warranty.
